Job Description

We are looking for a PHP Developer responsible for managing back-end services and the interchange of data between the server and the users. Your primary focus will be the development of all server-side logic, definition and maintenance of the central database, and ensuring high performance and responsiveness to requests from the front-end. You will also be responsible for integrating the front-end elements built by your co-workers into the application. Therefore, a basic understanding of front-end technologies is necessary as well.

Responsibilities

- Integration of user-facing elements developed by front-end developers
- Build efficient, testable, and reusable PHP modules
- Solve complex performance problems and architectural challenges
- Integration of data storage solutions

Skills and Qualifications

- Strong knowledge of PHP web frameworks Laravel and Angular.
- Other web frameworks like Laravel, Yii will be considered advantage value
- Well aware of Web-service building, REST API, JSON.
- Understanding the fully synchronous behaviour of PHP
- Understanding of MVC design patterns
- Basic understanding of front-end technologies, such as JavaScript, HTML5, and CSS3
- Knowledge of object oriented PHP programming
- Understanding accessibility and security compliance
- Strong knowledge of the common PHP or web server exploits and their solutions
- Understanding fundamental design principles behind a scalable application
- User authentication and authorization between multiple systems, servers, and environments
- Integration of multiple data sources and databases into one system
- Familiarity with limitations of PHP as a platform and its workarounds
- Creating database schemas that represent and support business processes
- Familiarity with SQL/NoSQL databases and their declarative query languages
- Using of Mysql stored procedure, Joining, Indexing, view, trigger, etc.
- Proficient understanding of code versioning tools, such as Git
- Experience with PrestaShop (mandatory) , Magento (mandatory), OsCommerce (mandatory), WordPress (optional), Drupal (mandatory), Moodle (optional), Joomla (optional) is good to have
- BS/MS degree in Computer Science, Engineering or a related subject
